

RCA disclosure statement on chiral separation or purification process

Dear Customer,

We would like to bring the following to your attention:

As a manufacturer of starting materials for pharma production, RCA adheres to highest standards concerning production and quality management, but we are not GMP-certified.

We will always act with the highest possible transparency towards our customers and share all necessary details, but to protect our intellectual property, we will generally not disclose batch-records or confidential details of our production processes.

We disclose the following chemicals:

- solvents
- toxic chemicals or chemicals of unknown toxicity

However, we do not disclose:

- a) non-toxic (GRAS-list),
- b) non-hazardous *or*
- c) non-mutagenic, non-cancerogenic materials, with low acute toxicity which are present in our material at a level of < 0.1%

These we do not declare,

as our final separation or purification process is only based on physico-chemical separation principles and we do not involve chemical reactions in this separation step.

Thank you for your understanding.
